THE EXCLUSIVE OPERATION AGREEMENT AND THE CONSOLIDATION

On 12 February 2026, the Board announces that, Sinomart Development, a wholly-owned subsidiary of the Company, has entered into the Exclusive Operation Agreement with Caofeidian Port Group, pursuant to which Caofeidian Shihua shall provide crude oil terminal operation services exclusively to Sinomart Development or customers designated by Sinomart Development.

Although the equity interests in Caofeidian Shihua held by Sinomart Development and Caofeidian Port Group remain unchanged at 90% and 10%, respectively, following the entering into of the Exclusive Operation Agreement and after reassessing the Group's relationship with Caofeidian Shihua in accordance with applicable accounting standards, Caofeidian Shihua has become an indirect non-wholly-owned subsidiary of the Company and its financial results will be consolidated into the consolidated financial statements of the Group.

1. Principal Terms of the Exclusive Operation Agreement

Parties	(i) Sinomart Development; and (ii) Caofeidian Port Group.
Exclusive service arrangement	Pursuant to the Exclusive Operation Agreement, with effect from the date of execution thereof, Caofeidian Shihua shall provide crude oil terminal operation services exclusively to Sinomart Development or customers designated by Sinomart Development, and the operation volume and schedule shall be determined in accordance with the instructions of Sinomart Development. Where Caofeidian Shihua intends to provide such services to parties other than Sinomart Development or its designated customers, the prior written consent of Sinomart Development shall be required.
Term	Five years commencing from the effective date of the Exclusive Operation Agreement, renewal subject to mutual agreement of the parties.
Effectiveness	The Exclusive Operation Agreement shall become effective upon being duly signed by the legal representatives or authorised representatives of both parties (or affixed with the chops of the legal representatives) and affixed with the company chops of both parties.

2. Reasons for and Benefits of entering into the Exclusive Operation Agreement

Although the equity structure of Caofeidian Shihua has not changed, the entering into of the Exclusive Operation Agreement enables the Company to strengthen its operational coordination and management over Caofeidian Shihua's crude oil terminal business. In particular, the Exclusive Operation Agreement allows the Company to exercise greater influence over customer resource management, crude oil unloading coordination and operational scheduling, thereby improving overall operational efficiency, enhancing cost control and optimising the utilisation of terminal resources. The Directors consider that such arrangements are conducive to the long-term, stable and efficient operation of Caofeidian Shihua and are in the interests of the Company and its Shareholders as a whole.

As a result of the enhanced operational control obtained through the Exclusive Operation Agreement and following a reassessment in accordance with the applicable requirements of the HKFRS, Caofeidian Shihua will be consolidated into the consolidated financial statements of the Group and become an indirect non-wholly-owned subsidiary of the Company. The Consolidation more accurately reflects the economic substance of the Group's control over Caofeidian Shihua, enhances the transparency, comparability and completeness of the Group's financial reporting, and provides more comprehensive and reliable financial information to the Shareholders.

None of the Directors, including the independent non-executive Directors, has any material interest in the Consolidation and required to abstain from voting on the relevant Board resolution.

The Directors, including the independent non-executive Directors, are of the opinion that the Consolidation is carried out on normal commercial terms, is fair and reasonable and is in the interests of the Company and the Shareholders as a whole.

3. Accounting Implication of entering into the Exclusive Operation Agreement

Prior to the entering into of the Exclusive Operation Agreement, Caofeidian Shihua was held as to 90% by Sinomart Development and 10% by Caofeidian Port Group. Notwithstanding Sinomart Development's majority equity interest, pursuant to the articles of association of Caofeidian Shihua, certain key operating decisions were subject to unanimous approval of the shareholders. Accordingly, Caofeidian Shihua had historically been treated as a joint venture and was not consolidated into the consolidated financial statements of the Group.

Following the entering into of the Exclusive Operation Agreement, the Company reassessed the Group's interest in Caofeidian Shihua in accordance with the requirements of HKFRS, in particular HKFRS 10. Under HKFRS 10, an investor controls an investee when the investor (i) has power over the investee; (ii) is exposed, or has rights, to variable returns from its involvement with the investee; and (iii) has the ability to use its power to affect the amount of the investor's returns.

With reference to the above requirements and having regard to the substance of the Exclusive Operation Agreement, it was considered that, following the effectiveness of the Exclusive Operation Agreement, the Group has obtained the power to direct the key operating decisions of Caofeidian Shihua and hence obtained control over Caofeidian Shihua within the meaning of HKFRS 10. Accordingly, Caofeidian Shihua has become an indirect non-wholly-owned subsidiary of the Company and its financial results will be consolidated into the consolidated financial statements of the Group with effect from the effective date of the Exclusive Operation Agreement.

 - b. the prevailing market price charged by any third party providing the same or similar services in the vicinity; and

The average gross profit margin of Caofeidian Shihua's crude oil unloading business for 2023, 2024 and the first half of 2025 was approximately 59.99%, 49.08% and 56.54% respectively, which is not less favourable

Annual caps

The following table sets out the proposed annual caps of the transaction amounts estimated to be received by Caofeidian Shihua under the Crude Oil Jetty Services Framework Agreements for each of the three years ending 31 December 2026, 31 December 2027 and 31 December 2028:

In arriving at the above annual caps, the Directors have taken into account, among other things: (i) the historical transaction amounts in respect of the provision of crude oil jetty services by Caofeidian Shihua to the relevant members of Sinopec Group; (ii) the pricing of RMB10.35 per ton charged by Caofeidian Shihua for providing crude oil unloading service as determined on arm's length basis; (iii) the expected demand for crude oil jetty services of not more than 15 million tonnes arising from the crude oil import and logistics arrangements of the relevant members of Sinopec Group, taking into account the existing throughput volume and operational capacity of the crude oil terminal operated by Caofeidian Shihua, and considering the future completion of the local crude oil storage base in Caofeidian; and (iv) the need to maintain an appropriate buffer to cater for potential fluctuations in throughput volume and operational requirements during the term of the Crude Oil Jetty Services Framework Agreements.

The payment terms of the transactions contemplated under the Crude Oil Jetty Services Framework Agreements will be determined by the parties on a transaction-by-transaction basis, in accordance with market norms and on normal commercial terms, with reference to the applicable pricing policies and mechanisms set out in the relevant Crude Oil Jetty Services Framework Agreements.

Reasons and benefits of the transactions

Caofeidian Shihua operates a crude oil terminal and related facilities located in Caofeidian, Tangshan, the PRC, which serve as an important logistics node for the import, unloading and handling of crude oil by certain members of Sinopec Group. The crude oil terminal and ancillary facilities of Caofeidian Shihua are geographically proximate to the operational areas of such members of Sinopec Group, and the crude oil import, unloading and logistics arrangements of those members of Sinopec Group are closely aligned and coordinated from time to time. Accordingly, Caofeidian Shihua has been providing crude oil jetty unloading, berthing and related services to certain members of Sinopec Group on a recurring basis in the ordinary and usual course of its business, with such members of Sinopec Group constituting major customers of Caofeidian Shihua for crude oil jetty services.

The entering into of the Crude Oil Jetty Services Framework Agreements enable the Group to continue capturing stable business opportunities arising from the crude oil import and logistics activities of certain members of Sinopec Group, enhance the utilisation efficiency of the crude oil terminal and related facilities operated by Caofeidian Shihua, and generate stable operating income for the Group. The Directors (excluding the Directors who have abstained from voting) consider that the transactions contemplated under the Crude Oil Jetty Services Framework Agreements are conducted in the ordinary and usual course of business of the Group and are in the interests of the Company and the Shareholders as a whole, after taking into account the factors stated in this announcement.

Internal control measures for the transactions

- (iii) **Management and Audit Committee oversight:** Relevant personnel of the Company report regularly to the audit committee of the Board on the implementation of connected transactions. Connected transactions are included within the scope of the Company's annual internal control assessment conducted by the risk control department and are covered in the risk management and internal control reports submitted to the audit committee, which conducts an annual review of the Company's risk management and internal control systems.

- (v) **Annual review by the auditors:** The auditors of the Company will conduct an annual review of the continuing connected transactions in accordance with the requirements of the Listing Rules and will provide a letter to the Board confirming that nothing has come to their attention that causes them to believe that such transactions (a) have not been approved by the Board; (b) were not, in all material respects, in accordance with the pricing policies set out in the relevant agreements; (c) were not carried out, in all material respects, in accordance with the terms of the relevant agreements; and (d) have exceeded the applicable annual caps.

In determining whether to accept the deposit service offered by Sinopec Finance Tianjin Branch, the finance department of the Company conducts regular market comparisons by obtaining contemporaneous quotations from at least two independent commercial banks for deposits of similar nature, amount and term;
- (iii) entrusted loan services: when Sinopec Finance Tianjin Branch provides entrusted loan services to Caofeidian Shihua, it shall charge an entrusted loan handling fee calculated based on the outstanding principal balance of the loan, which shall not be higher than the fees applicable to the same type of services offered by independent commercial banks;
- (iv) bill acceptance and discount services: when Sinopec Finance Tianjin Branch provides bill acceptance and bill discount services to Caofeidian Shihua, the discount rates shall be determined with reference to the rediscount rate prescribed by the PBOC, with a spread determined in accordance with market conditions, but shall not be higher than the interest rates applicable to the same type of loan services offered by independent commercial banks to other members of the Sinopec Group; and
